Summertown Interiors tackles poorly functioning spaces in two diverse projects. SHALAKA PARADKAR reports

Dubai-based Summertown Interiors, an international corporate turnkey design and fit-out solution specialist, recently added the Investment Corporation of Dubai (ICD) and the Dubai Women's College Library to its roster of clients, after completing two design projects for these organisations.

Located in the heart of the Dubai International

Financial Centre (DIFC), the multi-million-dirham ICD project comprises 2,300 sq m of office space that makes up its temporary headquarters. Summertown Interiors worked hand-in-hand with a French designer to create an elegant and comfortable workplace that accurately mirrors the company's brand image.
