

## d3 Headquarters

Summertown Interiors is delighted to deliver another unique interior solution in the Dubai Design District (d3) with the completion of the d3 headquarters office.

d3's brief was a contemporary, high quality workplace that embodied their company's brand, culture and value.

Partnering with project managers Tamdeen, and designers Eight Inc, Summertown was contracted due to our d3 project experience, craftsmanship in delivering high quality bespoke interiors, on time and within budget.

## d3 Headquarters

The design incorporated many bespoke features, including a 3D red leather clad wall and angled wooden display shelves. It also features unique meeting rooms, a majlis and a large area that accommodates a 3D model of the d3 district buildings and plans.

The challenge for Summertown on this project was to install the large variety of materials in the design including marble, wood, stone and leather within the timeframe without compromising on craftsmanship quality. By using our process driven approach the result is a unique, inspiring workplace that was delivered with quality craftsmanship.

## d3 Headquarters

d3 manages the Dubai Design District, a purpose-built district to nurture emerging local talent and provide a home for the region's creative thinkers.

The district is home to established international design, luxury and fashion brands, cafes and offices.
