

ACWA

Located in The One Tower at TECOM, with direct access to DIC METRO, ACWA's new offices are fresh, refined and functional.

ACWA's design brief was to create a timeless, fresh efficient workspace, incorporating multiple use meeting rooms and a community pantry area. The project included design and build with MEP, and IT scope.

ACWA

Summertown collaborated closely with ACWA through out the design and execution phases using value engineering to develop smart solutions to meet the interior space requirements on a limited budget.

The bespoke joinery designed in conjunction with ACWA was one of the most challenging aspect of the fit out due to the white finishes selected. Nevertheless, the end result is a fresh new workplace for their people that encompasses both functional working areas and a vibrant community recreation and pantry space.

ACWA

ACWA Power is a developer, investor, co-owner and operator of a portfolio of power generation and desalinated water production plants currently with operations in 10 countries in the Middle East, Africa and South East Asia regions
