

SMART Dubai Government

Located in the Dubai Design District (d3), Smart Dubai Government (SDG) sought a new office interior that incorporated the company's "smart" vision for design and functionality.

Summertown collaborated closely with designers Bluehaus Group, and project managers 3Sixty consult to achieve an amazing new workplace for SDG.

Natural materials, indoor landscaping and quality crafted panelling resulted in a vibrant inspiring office, that other businesses are eager to emulate.

SMART Dubai Government

Situated over two and half floors, the office incorporates large pantry and break out areas on each floor, with recreation games and community fruit boxes.

Meeting rooms and offices were installed with acoustic double-glazed glass walls, and leading technology AV equipment, whilst open activity based areas feature writable walls and comfortable designer seating ideal for team collaboration.

SMART Dubai Government

SDG is the technology arm of the Dubai government; an initiative to use technology to enhance and transform the lives of the Dubai residents.
